

COMPANY PROFILE

Our story begins in 2012 in a historical city thriving for furniture making. It was Muar, **Malaysia** where 5R Technologies produce its first piece of furniture part using the high-pressure moulding technology, a technology our founder – Mr See Beng Yeaw – deem promising. The technology offers high density, mould-formed and durable products.

Four years after founding, Mr See launched the brand Smart Top® and slowly brought the company to the light. For his time in the furniture coating industry, he has seen the beauty of furniture paints can create as well as its drawbacks. He inspired to bring a high quality table top brand to the market that overcome the drawbacks of other materials, such as stone, wood, cement and glass.

At first, there was only one finishing available – Smooth. The beautiful and elegant looks of Smart Top®, on top of its attractive and impressive product features, very soon adored by the **food serving** industry in the local and overseas.

In year 2018, Mr See created the world first textured surface moulded table top – Rough. It mimics the looks and feels of natural creation – stone and wood. It is definitely love at first sight for those who favour the nature creation and a unique table top. The invention is now patent granted. Our pride and honour! The creation of textured surface brought our brand to next chapter as a quality table top provider. In 2022, new textured surface – Supermatte – is introduced.

In the same year of introducing Rough, we expanded to provide **home furniture**. We glad that Smart Top® is as beautiful as its durable. Seeing our products known by the world, owned by so many houses, cafés and restaurants, we have no way to express our gratitude but forever grateful and promise to continuously improve, growth and create. In everything we do, we are always dedicated to our mission and vision.

Our Mission

To create durable and stunning table top.

Our Vision

Be an alternative to expensive rare wood and stone table top;
reduce deforestation and marble mining.

Turning wood waste into table top

Smart Top located in a city full of furniture manufacturer. We collect wood waste from other factory and give them a new life. With our unique technique and technology, Smart Top® is able to create table top that look like a real stone and wood.

What makes us stand out in the market is not only the beautiful appearance, but also the practical product features. Our product features are:

- Water resistant
- Stain resistant
- Wear resistant
- Heat resistant
- Impact resistant
- UV resistant
- Peel resistant
- Cigarette burn resistant
- High density
- High screw holding capacity
- Dimensional stability
- Minimum maintenance
- Environmentally friendly

Products we provide

- Home Furniture (dining table, occasional table, gathering table, chair, and etc.)
- Table Top (for cafés & restaurants)
- Other furniture parts (door panel, chair seat)

Product Design & Development

For home furniture, our in-house R&D team come out with around 40 models each year. We also accept request from our customers to design and prototype new models based on their specification. All products are available in knock-down (KD) fitting; they are design to be put together easily and quickly using the tools that came with the box.

Our company (factory, office and showroom) is located in Muar, Johor, Malaysia. It is at the south of Malaysia. We have around 100 employees, 3 managers and 8 supervisors. The production worker is around 80 people. We have 14 assembling line. The working hour is 8-10 hours a day. The minimum legal working age is 18 years old.

Our factory operate 24 hours a day and 7 days a week. The current monthly production is around 25,000 table tops, which is at 50% of the full **capacity**. We ship 8-12 containers a month. 89% of our sales are export sales. For table top purchase order, 20FT container can load up to 3000-3500 pieces table top; for home furniture purchase order, 40FT container can load up to 600-1000 pieces table. Our F.O.B ports are Pasir Gudang port and Tanjung Pelepas port, both ports are in Johor.

Other than standard **packaging** for the products, we also provide special packaging by request from customers. We have experience developing packaging for e-commerce that pass the ISTA 6A package test. All products are available in flat packaging.

5R Technologies Sdn Bhd is the manufacturer of Smart Top™ and parent company of Smart Top Surface Solution Sdn Bhd.
