JOIN US IN ACHIEVING

Sustainable Development Goals

Join the movement towards sustainability with Smart Top—the eco-friendly choice for elegant table surfaces.

Goal 12: Responsible Consumption and Production

Made from upcycled materials, Smart Top embodies our company’s commitment to sustainable consumption and production. By repurposing wood waste—once destined for disposal—into appealing table tops, the production of Smart Top contributes to waste reduction efforts, diverts waste from landfills, and promotes a circular economy. It also actively reduces the demand for new resources and minimises the environmental impact associated with extraction, helping to conserve natural resources.

Goal 15: Life on Land

Smart Top offers eco-friendly alternatives to traditional materials such as wood and marble. With Smart Top, you’re supporting efforts to preserve forests and reduce deforestation, minimising the need for harmful marble mining, safeguarding our precious natural resources.

Goal 9: Industry, Innovation and Infrastructure

Through our innovative production techniques, Smart Top offer designs that emulate the warm, rich tones of wood, the elegant veining of marble, and the charm of rustic metal. Smart Top recreates the natural beauty of these materials while enhancing durability, effectively preventing damage and replacement of the table top, ensuring long-lasting usage, thus minimising waste.

Say goodbye to deforestation and marble mining with our innovative alternatives.
